

Gender Atlas

Organization: UNICEF

Location: India

Description

- Highlight the issues, geographies and social background of girls
- Analysis to identify the bottlenecks for targeted planning
- Management tool that can focus on 'demand' and 'supply' side issues

Challenges

- Identify low performing geographic pockets for girls education
- Identify vulnerable geographic pockets for girls with disabilities

Solution

- Map visualization to identify clustered vulnerable geographic locations
- District and Block level status on key parameters for girls' education at primary, upper primary and secondary levels
- Trend analysis and tracking of performance
- Critical decisions and action in pockets where performance is below par
